DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6 and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The relation between the diameters of the spring and the pocket in claims 6 and 12 were not disclosed in the originally filed application. This is a new matter rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 5, 7, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Zabeck et al. (US Patent Number 5,503,366).

Zabeck et al. disclose a valve assembly comprising: a valve body defining an inlet, a controlled outlet and a passageway therebetween; a valve stop (6) and a valve seat (9) supported within said valve body in axial alignment with said controlled outlet; and a plunger (3)

Art Unit: 3754

reciprocable between the valve stop and the valve seat to open and close said controlled outlet, said plunger further including a central bore (37) having an insert (25) molded (see column 4, lines 44-47) therein to define a dome-shaped stop-cushion (22) at an end proximal the valve stop and a valve tip (8) at an end proximal the valve seat, wherein the plunger has a pocket and the valve stop and the spring (5) are disposed partially within the pocket (see Fig. 1); wherein a solenoid actuator (2) is operable on said plunger to open and close said passageway; and further comprising a non-conductive insert (15).

Allowable Subject Matter

5. Claim 8 is allowed.
6. Claims 3, 4, 10, 11, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 2, 5-7, 12, and 13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3754

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
